Furthering a Reputation for Identifying and Quenching Consumer Tastes
PROFILE

Founded in 1889, Asahi Breweries, Ltd., is Japan's foremost innovator in the beer industry. Asahi Super Dry, Japan's leading beer, achieved sales of approximately 170.6 million cases in the fiscal year ended December 31, 1997. Asahi boasts fully integrated production, inventory control, and marketing systems that operate under the Company's Fresh Management principles to ensure the timely supply of products to consumers. Overseas, Asahi is cooperating with other leading breweries to promote the Asahi brand name in major beer markets throughout the world.

In pursuing business development, Asahi gives careful consideration to environmental preservation at all times and is close to realizing the goal of zero waste in all its production operations. We are committed to improving the communities we serve while meeting the needs and fulfilling the expectations of consumers with products of the highest quality.

**OPERATIONAL HIGHLIGHTS**

- Asahi defied insipid market conditions to record the largest year-on-year growth in operating profit among Japanese breweries.
- In 1997, *Asahi Super Dry* remained the leading beer in Japan and set new shipment records.
- Among financial restructuring activities, Asahi’s wholly owned Australian subsidiary Asahi Beer International Holding (Australia) Ltd. sold its shares issued by Foster’s Brewing Group Ltd. and bonds.
- Having achieved a 100% component and by-product recycling rate at its Ibaraki Brewery, Asahi has now set its sights on realizing zero waste in all production operations by 1998.
During fiscal 1997, ended December 31, 1997, the Japanese beer industry continued to be affected by the dramatic restructuring taking place in the domestic distribution and marketing sectors. Amid further change, annual domestic beer sales on a tax volume basis contracted 2.2%, in contrast with marginal 1% growth in the previous fiscal year. This result reflected dampened consumer spending following the increase in the national consumption tax rate in April 1997 and the elimination of special income tax reductions. Against this backdrop, Asahi Breweries, Ltd., concentrated on boosting sales of its flagship beer, Asahi Super Dry. The Company complemented these efforts by promoting Asahi Kuronama (Black Draft Beer), Asahi First Lady, and other offerings with distinctive tastes catering to emerging market segments. The success of aggressive, well-focused campaigns underpinned an 11% rise in net domestic beer sales and enabled the Company to increase its share of the domestic beer market four percentage points, to 34.4% on a tax volume basis. Asahi Super Dry was again a star performer, with sales advancing 17% from the previous year's level. Asahi has sold more than 100 million cases of Asahi Super Dry for nine consecutive years, and it is now firmly established as the leading beer in Japan. In other alcoholic beverages, The Nikka Whisky Distilling Co., Ltd., prepared for the stimulus to demand provided by revisions to the Liquor Tax Law in October 1997 by releasing New Malt Club, Black Nikka Clear Blend, and other whiskies and endeavored to assemble a more diverse product lineup to attract a broader customer base. However, sales gains made in the latter part of the year were not enough to compensate for overall weak demand, with sales declining on the whole. This decrease was more offset by higher beer sales, and consolidated sales of alcoholic beverages rose 9.1%, to a record figure of ¥1,017.9 billion for the year under review. In soft drinks and food, sales of such mainstay products as Mitsuya Cider and Bireley’s fruit juice drinks expanded steadily, while the new canned coffee WONDA, which was released in September 1997, was well received by the market. Consequently, consolidated sales of soft drinks and food grew 6.3%, to ¥204.2 billion. Consolidated pharmaceutical sales increased 4.3%, to ¥41.9 billion, with higher sales of in-house-developed drugs contributing to the growth in profits in this sector. Real estate leasing and sales revenues totaled ¥4.5 billion, up 17.5% from the previous year's figure. As a result of the aforementioned performances, consolidated net sales in fiscal 1997 expanded 8.4%, to ¥1,313.3 billion, and net income leap 40.4%, to ¥116 billion—a record high. Net income per share soared ¥5.97, to ¥25.15, and Asahi’s cash dividends per share applicable to the year were ¥110.00, up from ¥100.00 in fiscal 1996.

SERVING CONSUMERS
All of Asahi’s corporate activities are based on a management philosophy that views superior customer service and product quality as critical to building a successful business. Our Fresh Management principles emphasize the integration of research, production, distribution, and marketing activities to optimize product quality. In specific terms, we have gradually reduced delivery times and now ensure that Asahi Super Dry is on retailers’ shelves within eight days from the completion of production. Customer satisfaction is an evolving goal that is only achieved through careful observations and well-considered responses. Therefore, we closely monitor lifestyle trends and consumer preferences. Information gathered through meticulous market research forms the fiber of our product development, advertising, and sales activities. We believe the outstanding growth in the market share of Asahi Super Dry and the emergence of our specialty beers reflect our understanding of taste preferences and is evidence of consumers’ high appraisal of the quality of our offerings.

Furthering a Reputation for Identifying and Quenching Consumer Tastes

During fiscal 1997, ended December 31, 1997, the Japanese beer industry continued to be affected by the dramatic restructuring taking place in the domestic distribution and marketing sectors. Amid further change, annual domestic beer sales on a tax volume basis contracted 2.2%, in contrast with marginal 1% growth in the previous fiscal year. OVERSEAS DEVELOPMENT

Looking at the global beer market, consumption has reached maturity in the United States, the world’s largest market, and in the countries of Europe, where beer has a long and rich history. This situation stands in sharp contrast with China and countries in Latin America, such as Mexico and Brazil, where striking growth rates are being recorded. Particularly eye-catching is the soaring demand in China, which has the world’s second largest consumption in terms of volume and is expected to outstrip the United States to become the world’s largest beer market by 2000. Asahi is moving forward rapidly with plans to expand its presence in the United States, China, and Europe. In 1997, we concluded an agreement with China’s oldest and largest brewer, Tsingtao Brewery Company Ltd., to form a joint venture, Shenzhen Tsingtao Beer Asahi Co., Ltd., in Guangdong Province. A brewing facility now being constructed is expected to be completed and ready for production in early 1999. In 1998, brewing of Asahi Super Dry will commence at a brewery in Yantai, in Shandong Province. Asahi Super Dry is now sold in more than 30 countries. We will allocate the resources necessary to build a network capable of supplying fresh beer to customers throughout the world and establish our flagship beer as a major player on the world stage.

FUTURE STRATEGIES

In 1998, demand for beer in Japan is forecast to grow between 1% and 2%. Our marketing strategy will continue to focus on reinforcing the image of Asahi Super Dry, complemented by specialty beers brewed to meet consumers’ discriminating tastes. The ongoing implementation of Fresh Management principles and measures to enhance the effectiveness of our information network will be crucial to securing customer loyalty. The strengthening of our overseas network will take on greater significance in 1998, and we will strive to establish global operating standards as soon as possible to boost our competitiveness in the international arena.

As regards facility investment, in October 1997 we completed our Research & Development Center in Ibaraki Prefecture. This center will play the leading role in our R&D activities through the 21st century. Our ninth domestic brewery, in Shihoku, is scheduled to come on line in June 1998. In addition, further outlays will be made with the aim of realizing zero waste at all production facilities. We have initiated an environmental upgrading program at our Nagoya Brewery that will transform it into an epoch-making chlorofluorocarbon-free (CFC-free) brewing facility. In conducting the aforementioned activities, we aim to create new synergies within the Asahi Group that reinforce our management philosophy. This will ensure that all employees are aware and focus on our ultimate goal of complete customer satisfaction.

I look forward to the continued support and guidance of shareholders and friends in these endeavors.

March 1998

Yuzo Seto,
President and Representative Director
An Interview with Senior Management: Asahi has realized rapid sales expansion by responding to changing Market Trends and implementing comprehensive Product Quality management measures.

Well-focused marketing campaigns have propelled Asahi Super Dry's rise to become the leading beer in Japan and helped carve out market niches for the Company's specialty beers. This growth has been supported by prudent Financial Strategies and programs to raise Environmental Standards throughout all our operations. Asahi is now devoting greater resources to strengthen its presence in overseas markets and enhance Asahi Super Dry’s image as a World Brand.
Marketing Activities

Innovative Marketing Places

Asahi Super Dry at the Head of the Pack

The information revolution that has taken place in Japan over the past 10 years has underpinned Asahi Super Dry's remarkable rise to the leading position among domestically sold beers in 1997. This revolution has expanded consumers' knowledge of products and changed their concept of product value—developments that have provided significant opportunities to those companies willing and able to respond quickly to signals from the marketplace.

The centerpiece of Asahi's endeavors to achieve customer satisfaction has been the Company's pursuit of Fresh Management principles. This campaign was launched in 1993 with the basic aim of minimizing the time elapsed between the completion of brewing to delivery to retailers. Fresh Management principles emphasize raising Companywide efficiency to even higher levels through the integrated management of procurement, production, distribution, and marketing activities. In 1997, on average, Asahi Super Dry reached retailers' shelves within eight days of the completion of production. In 1998, Asahi's goal is to reduce this period to less than eight days. Asahi has capitalized on the success of Asahi Super Dry by launching a number of specialty beers that target expanding market segments. The refined taste of Asahi Kuronama (Black Draft Beer) has been well received in the market, and Asahi First Lady, a low-calorie beer, has captured a growing following among women. Asahi also markets a number of foreign beers in Japan, including Miller Special, Bass Pale Ale, and Löwenbräu, to accommodate a wider range of tastes.

The successful blending of image and quality is extending Asahi Super Dry's appeal across a broader market cross section. Asahi's willingness to take on the challenges being presented in the information era represents its commitment to achieving consumer satisfaction.

"Turning Information into Profit"

The Company's ongoing investment in information infrastructure is evidence of the priority it places on being able to accurately anticipate market needs—the key to profitable growth.

In 1994, Asahi's management decided to implement an information infrastructure construction plan to improve its ability to identify and respond to changes in the marketplace. The two main thrusts of this plan were the promotion of end-user computing (EUC) and the establishment of a Companywide E-mail network. Since its commencement, more than 3,500 PCs have been installed at factories and branches and connected to the Company's information network—the Asahi Supernet. As part of this information enhancement process, in June 1997 Asahi issued notebook computers to all its sales representatives. This decision has improved customer service standards by enabling sales representatives to access the Company's central data base and provide retailers with accurate and useful information as well as strengthening the foundations for future growth by raising employees' knowledge of the Company's information systems. Furthermore, the exposure to new technology has heightened our sales representatives' awareness of the importance of monitoring consumer trends and developments in the operating environment.

Asahi has also distributed electronic notebooks to its 1,600 part-time female sales representatives—marketing ladies—who, in addition to performing various promotional tasks, play a crucial role in carrying out Asahi's Fresh Management principles by checking the age of inventory in stores.
“Sending a Clear Message”

The consistency of the theme in Asahi Super Dry advertising campaigns has strongly affirmed the quality of the Company’s premier beer in consumers’ consciousness. Asahi has resisted the trend of imitation prevalent in industry advertising, thereby distinguishing and reinforcing the market image of Asahi Super Dry and its other beers. At the same time, the Company’s attentiveness to changing consumer tastes has underpinned a gradual strengthening of consumer loyalty to the Asahi brand.

“The Japanese Market”

Asahi plans to establish a joint venture with Miller that will help raise the profile of Asahi Super Dry, which is brewed in North America by Canadian brewer Molson.

“Making Asahi Super Dry a Global Brand”

Having claimed the position of Japan’s leading beer with Asahi Super Dry, Asahi is now looking to extend the excellent reputation of its flagship beer to overseas markets. The Company is steadily expanding its international production and marketing network that includes alliances with several major brewers, with a view to establishing Asahi Super Dry as a truly global brand. In December 1997, Asahi entered into an agreement with TTCBU Corporation, Sumikin Bussan Corporation, the Chinese brewer Tsingtao Brewery Company Ltd., and the Hong Kong investment company Pine Seal Investment Limited to establish a brewery in Guangdong Province. The joint venture, named Shenzhen Tsingtao Beer Co., Ltd., will have an initial annual production capacity of 100,000 kl and is scheduled to commence operations in early 1999. The brewery will produce Asahi Super Dry and Tsingtao Beer primarily for the southern Chinese market, including Hong Kong. Asahi is already making plans to expand the brewery’s annual production capacity to meet an expected increase in domestic demand and intensity its exports to the burgeoning beer markets in Southeast Asia. The joint venture strengthens Asahi’s existing manufacturing facilities in China. Asahi and TTCBU, as equity holders, have participated since 1994 in the management of four Chinese brewers, who between them operate five breweries—in Beijing, Yantai, Hangzhou, Quanzhou, and Jiaxing. Asahi Beer, a beer jointly developed by Asahi and its four
local brewing partners, recorded sales of 1.8 million cases in 1997, up 20% from the previous year. ◆ In 1997, the Company established the China Business Coordination Department to strengthen the management of its operations and dispatched managerial staff to Beijing, Shanghai, and Guangzhou. Moreover, technical staff have been transferred to each local company to raise product quality and improve skill levels. Brewing of Asahi Super Dry will commence at the Yantai Brewery in 1998.

Turning to Europe, Asahi entered the German beer market in October 1997 with the launch of Asahi Super Dry. The Company believes that achieving success in Germany, one of the world's oldest beer markets, is crucial to establishing Asahi Super Dry as a leading international beer. In the United Kingdom, Asahi Super Dry is being sold through the extensive retail network of a major British brewer, Bass Brewers Ltd., with whom Asahi concluded a marketing agreement in May 1996.

In North America, Asahi is pursuing growth through a broad-based alliance with Miller Brewing Company, of the United States. Asahi Super Dry has been produced in Canada since 1994 by Molson Breweries, a major brewer. In 1998, Asahi plans to strengthen its presence in North America by joining with Miller to establish a new marketing joint venture.

Asahi believes that the environmental standards of its operations—production, in particular—are reflected in the quality of Asahi Super Dry and its other beers. The Company's numerous and far-reaching environmental measures are directed toward the achievement of four main goals. ◆ In environmental management, the elimination of waste from production facilities is Asahi's top priority. The Company is adopting a two-pronged approach to realize its goal of zero waste by lowering the volume of by-products and developing recycling processes to convert industrial waste into usable resources. In 1997, the Company moved closer to achieving this goal when both its Fukushima and Tokyo breweries joined the Ibaraki Brewery in achieving a 100% recycling rate for their components and by-products.

Asahi aims to accomplish a similar recycling level at all its breweries in fiscal 1998. ◆ Complementing these endeavors are efforts to lower the energy consumed and water used at breweries. The average amount of energy required to produce one kiloliter of Asahi's beers currently stands at 661,000 calories per kiloliter. The Company aims to reduce this figure approximately 14.1% in the near future. ◆ More efficient use of energy and resources is crucial to Asahi's third goal of reducing carbon dioxide (CO2) emissions as well as those of other greenhouse gases and ozone-depleting substances. ◆ Finally, Asahi is working to improve the recyclability of the containers in which its beer is sold. To this end, the Company is cooperating with other breweries in a project to develop facilities to recycle aluminum cans.

Asahi has established an internal environmental audit network and conducted audits at all its breweries throughout the year.

“Creating a Model Factory”

Asahi has announced plans to invest ¥3.5 billion to upgrade the environmental quality of its brewery in Nagoya. The planned reforms will create an epoch-making CFC-free brewery. The brewery will become a model facility at which new environmental technologies will be evaluated before being introduced to other breweries. ◆ Specifically, Asahi will introduce cogeneration, ammonia-absorbing refrigerators, which will serve the dual purpose of improving energy efficiency and eliminating CFCs. Ventilation equipment that uses ammonia and propane will be replaced with chilled water ventilating systems. Also, methane gas generated in water treatment processes will be harnessed as an energy source. Even vending machines at the factory will be modified to prevent CFC emissions. ◆ The energy reductions achieved through this investment are expected to result in annual cost savings of ¥400 million and lower CO2 emissions by an amount equivalent to 8% per kiloliter of beer produced.

The new Research & Development Center, in Ibaraki Prefecture.
Asahi's beer sales have soared 500% during the past 13 years. The major contributor to this explosive growth has been Asahi Super Dry. In only 10 years since its release, the Company's flagship beer has risen to claim the position of Japan's leading beer. It is marketed in more than 30 countries and is the fourth largest selling beer in the world. In 1997, Asahi captured 34.4% on a tax volume basis of the domestic beer market and, at the current pace of sales growth, is on target to secure a leading share in the near future. Asahi's beers are brewed in China and North America, and the Company is rapidly building a worldwide production network to ensure timely supplies to regional markets. The international beer market is now characterized by the rapid expansion of brands outside their national borders. In this era of globalization, the development of international operating and financial standards is more important than ever. Asahi is making adjustments essential to stay ahead of rival breweries while improving the transparency of its business practices.

**Structural Integrity and International Competitiveness**

The implementation of financial strategies aimed at reinforcing its financial structure is...
a key part of Asahi’s plans to create an internationally competitive organization. Asahi has aggressively invested in new production facilities to realize the capacity required to support sales growth and made significant investments to build its presence in overseas markets. During this time of growth, the emphasis in investment decisions was weighted toward production capacity. However, this focus is now being shifted to fostering greater organizational flexibility, with the goal of maximizing the efficiency of capital allocations. Specifically, Asahi has moved to reduce the number of outstanding shares, liquidate specified money trust operating assets, and write off investments in unprofitable overseas operating companies. As a result of these measures, the company has stimulated greater cash flows and significantly reduced the amount of interest-bearing debt on its balance sheets. This debt has declined from a peak of ¥1,411.1 billion in 1992 to ¥856.2 billion as of December 1997, thereby strengthening the company’s cash flow balance. During the same period, Asahi’s shareholders’ equity ratio rose from 13.7% to 23.2%. These measures have also boosted the financial strength of the Asahi Group. Asahi continues to review the business prospects and profitability of all Group companies while planning measures to achieve stable growth.

“Moving Forward as a Group”

In 1998, all companies in the Asahi Group will maintain priority on delivering products of the highest quality to achieve the ongoing goals of realizing consumer satisfaction and supporting healthy, vigorous lifestyles throughout the world. Having recorded outstanding sales growth rates in the domestic market during recent years, Asahi is now promoting global management standards to create an organization that is equipped to succeed in an era of megacompetition. Nineteen ninety-eight will be an important year for Group companies to advance existing programs and inaugurate measures to ensure a smooth transition into the 21st century. Asahi is not pursuing expansion per se, but profitable growth, and is therefore committed to implementing the reforms necessary to attain a Group structure that utilizes capital efficiently and profitably.

**Total capital turnover rate**

**Net income and ratio of net income to net sales**

**Ratio of net income to total capital employed**

---

---

---
Hindered by a downturn in consumption and unfavorable weather conditions, the domestic beer market contracted 2.2% on a tax volume basis in fiscal 1997. Despite this severe environment, Asahi posted an 11% increase in net domestic beer sales—the second consecutive year of double-digit sales growth—and boosted its market share for the sixth consecutive year. Asahi Super Dry celebrated in style the 10th anniversary of its release, posting a 17% year-on-year increase in sales and claiming the position as Japan’s leading beer. Sales of Asahi Super Dry exceeded 100 million cases for the ninth consecutive year as its popularity continued to rise across the market.

In the market for specialty beers, Asahi’s pioneering Asahi Kuronama (Black Draft Beer) registered sales of 2.86 million cases and continued to be praised for its distinctive taste. Asahi First Lady, a low-calorie offering developed mainly for female consumers, improved on the commendable performance given in its inaugural year in 1996, reaching sales of 980,000 cases in the year under review.

The commencement of domestic production in April 1997 assisted Asahi in improving the quality of Asahi First Lady and thereby ensuring a loyal consumer base. Turning to operations management, under the slogan “The New Asahi Era—Transforming Innovative Concepts into Winning Business Strategies and Activities,” Asahi worked to further integrate all aspects of its production, inventory control, and marketing systems in accordance with the Company’s Fresh Management principles. To this end, the Company introduced a new information system to reduce the time it takes to revise production schedules and cooperated with can manufacturers to establish a computer-terminal-based ordering system. Asahi’s domestic sales network, the industry’s largest, comprises seven regional headquarters with jurisdiction over 75 branches. In 1997, the Company began distributing notebook computers to sales representatives, Asahi’s marketing foot soldiers, to maximize the potential of its central data base and facilitate faster and more precise information gathering and analysis. Asahi’s responses to distribution and consumption patterns continue to propel the growth of Asahi Super Dry and enable the Company to carve out market niches with strategic specialty beers. While advertising activities mainly centered on Asahi Super Dry, the unique tastes of Asahi’s other beer offerings were also highlighted in campaigns that reflected changing lifestyle preferences. Asahi continues to look for new foreign beers that cater to Japanese consumers eager to try overseas beers. The refreshing Miller Special, the satisfying Bass Pale Ale, and other foreign beers marketed by the Company performed well in 1997. Due to the aforementioned factors, Asahi’s beer sales rose 10.6% during fiscal 1997, to total ¥959,864 million.

**OTHER ALCOHOLIC BEVERAGES** Most of Asahi’s operations in alcoholic beverages other than beer are handled by The Nikka Whisky Distilling Co., Ltd. While the popularity of low-alcohol-content beverages in
Japan continued to rise during the year under review, revisions to the Liquor Tax Law in October 1997 led to a decline in whiskey prices, a development that stimulated consumers' interest in this spirit. Maintaining its consumer-focused product development activities, Nikka Whisky Distilling released a selection of new whiskeys in 1997. The company's New Blend was well received in the commercial market, while its New All Malt, New Malt Club, and Black Nikka Clear Blend whiskeys fared well amid buoyant demand in the household sector. In wines, commercials featuring a popular Japanese artist boosted sales of the sparkling wine Cidre and other products. Despite the pickup in demand at the end of the year, the combination of the earlier stagnant market conditions and efforts to reduce inventory levels resulted in sales declining 10.0%, to ¥57.6 billion.

**OUTLOOK**

Demand for beer in Japan in 1998 is predicted to expand approximately 2%. Amid this growth, consumers' concepts of quality and value are expected to steadily change. This will compel brewers to review their marketing strategies to find a balance between product quality and price that concurs with the general consumer consensus. In 1998, Asahi will again concentrate on enhancing the market profile of Asahi Super Dry and complementing the appeal of its flagship beer with strategically marketed specialty beers. Further raising Asahi Super Dry's profile in overseas markets is a top priority for Asahi, and, to this end, greater resources will be directed toward strengthening alliances with foreign brewers and ensuring the smooth start-up of new production facilities. Due to the rising popularity of Asahi Super Dry, Asahi plans to bring forward the commencement of operations at its Shikoku Brewery, the Company's ninth domestic brewery, to June 1998. In view of an upcoming revision to the Liquor Tax Law that is expected to invigorate the market for whiskey, Nikka Whisky Distilling is aiming to secure the loyalty of new consumers with high-quality offerings and broaden its consumer base through innovative alcoholic beverages.
**Soft Drinks and Food**

**SOFT DRINKS**

Asahi Soft Drinks Co., Ltd., has a broad lineup of soft drink products. In fiscal 1997, despite unseasonably cool weather in the peak demand months of July and August, soft drink shipments increased 3%, to an estimated 1.6 billion cases. This was primarily due to favorable weather conditions in the spring and autumn months and the success of manufacturers catering to changing consumer tastes through such measures as the release of new sugarless drinks and drinks in 500 ml polyethylene terephthalate (PET) plastic bottles. Amid this environment, Asahi Soft Drinks pursued aggressive marketing to enhance the appeal of such mainstay brands as Mitsuya and Bireley’s and bolstered its product lineup with the introduction of a new canned coffee, WONDA.

Sales activities again focused on expanding the network of vending machines that carry its offerings and conducting campaigns to raise the profile of its products at supermarkets and convenience stores. The company was rewarded for these diligent efforts with a 13% increase in soft drink shipments, to 113.5 million cases. In carbonated beverages, Asahi Soft Drinks released Mitsuya Pink Soda to complement its other Mitsuya brand drinks. The continued success of the Ichiro Campaign, featuring one of Japan’s most popular baseball players, helped boost sales 13% above the previous year’s level. In September 1996, Asahi Soft Drinks launched a vegetable juice drink under its Bireley’s brand and began promoting a revamped brand image for fruit juice and vegetable juice. The success of this strategy was reflected in a 30% increase in sales of Bireley’s brand drinks, as opposed to a nearly 10% contraction in industrywide fruit juice sales. Bireley’s Peach was a particularly outstanding performer, reaching 3.3 million cases, more than triple the original projections.

Asahi Soft Drinks’ new WONDA canned coffee performed above expectations, reflecting a total marketing strategy centered on advertisements featuring golf sensation Tiger Woods, which had the desired effect of sparking consumer interest. Shipments of this product reached 7.7 million cases, and total sales of canned coffee, including sugarless Kafeo, rose 20%. Asahi Soft Drinks released Teao, its popular sugarless, mildly sweet tea in a 500 ml PET plastic bottle, in response to consumer preference for this larger size. Higher sales of this beverage contributed significantly to a 24% increase in black tea sales.

Since its release in 1993, Asahi Juroku Cha, a blended Japanese tea containing 16 different natural ingredients, has recorded steady sales growth against a background of increasing demand for sugarless drinks. In 1997, sales advanced 9%, to 23.6 million cases. Also, sales of the company’s Japanese green tea drink, Ajiwai Ryoku Cha, soared 44%, to 1.74 million cases. As a result of these stellar performances, sales of other teas as a whole expanded 6% during the year under review. In fiscal 1998, Asahi Soft Drinks will promote further reforms to improve its ability to respond to changing consumer needs and deliver high-quality products that contribute to healthy lifestyles.

Asahi's food-related operations are mainly carried out through a wholly owned subsidiary, Asahi Beer Food, Ltd. This subsidiary manufactures and markets foods and food ingredients, principally brewer's yeast extracts and related products.

In fiscal 1997, food manufacturers struggled to attract support for new products as insipid economic conditions dampened consumers' enthusiasm toward trying new items. Amid this environment, sales in the freeze-dried food category expanded 14%, thanks mainly to strong exports. In contrast, sales of brewer's yeast extracts and flavorings suffered due to weak demand from food manufacturers, while those of commercial food products remained flat as conditions in the restaurant industry worsened. On a brighter note, the commencement of sales of otsumami shozai (side dishes) to convenience stores in spring provided a significant boost to consumer retail food product sales, which reached six times the level recorded in the previous fiscal year. Due to these factors, consolidated sales of soft drinks and food increased 6.3%, to ¥204.2 billion, in 1997.

In 1998, soft drink sales are forecast to expand between 1% and 2%. Under the slogan "Breakthrough for a Bright Tomorrow," Asahi Soft Drinks will implement measures to strengthen its operating structure, raise the quality of product development and marketing activities, and rejuvenate sales promotions. The company has set specific targets to achieve double-digit sales growth for the third consecutive year and realize the highest sales growth among major beverage producers. Looking at product strategies, Asahi Soft Drinks is confident its efforts to boost the market appeal of WONDA will assure a greater share of the canned coffee market—the largest among nonalcoholic beverages—while campaigns to reinforce the well-established images of products sold under the core Mitsuya and Bireley's brands will help secure further sales gains. Also, the Company will take further steps to promote products that are suited to the expanding trend of health awareness, for example, by introducing new advertising campaigns to strengthen the position of such products as Asahi Juroku Cha and Teao in the strong growth markets for sugarless beverages. In emphasizing a total marketing approach, Asahi Soft Drinks will strive to develop new products that complement its existing lineup and form a springboard for advancing sales growth. In marketing activities, Asahi Soft Drinks will focus on three areas—product quality, information, and sales—in its endeavors to differentiate the company's soft drink brands and raise consumers' awareness of Asahi products. Centering on the activities of the company's Environmental Affairs Section, which was established in autumn 1997, Asahi Soft Drinks will work to improve the environmental soundness of its operations, in particular, through the elimination of industrial waste at factories.
Pharmaceuticals

Two consolidated subsidiaries, Torii Pharmaceutical Co., Ltd., and Asahi Beer Pharmaceutical Co., Ltd., are responsible for Asahi’s operations in the pharmaceuticals market. Torii Pharmaceutical’s mainstay product, Futhan, an injectable protease inhibitor, performed well as it moved toward maturity, recording a 3.3% year-on-year sales increase. Among the company’s ethical drug lineup, sales rose slightly for Urinorm, a treatment for hyperuricemia, and Uribid Tablets, a treatment for myasthenia gravis and dysuria. In addition, the company registered favorable sales of Antebate, a topical steroid preparation. An increase in the percentage of sales accounted for by in-house-developed products reduced sales costs, which resulted in improved profits.

Sales of Asahi Beer Pharmaceutical’s EBIOS brewer’s yeast preparation continued on a downward trend in 1997. The company’s lactic acid bacteria preparation, New Lactone A, has steadily secured a larger customer base since its release in October 1996 and is being distributed by an expanding network of pharmaceutical outlets. However, sales declined in 1997, reflecting the large shipments in the months following its release and product returns. On the other hand, Chinese medicine sales grew 4%. In bath products, sales of commercial-use products expanded 3% amid harsh market conditions. However, the company’s withdrawal from the highly competitive market for liquid products resulted in a 24% decline in overall bath product sales. Due to the combined effect of these factors, Asahi’s consolidated pharmaceutical sales rose 4.3%, to 441.9 billion.

OUTLOOK: Amid an uncertain outlook in the operating environment, Asahi’s subsidiaries plan to reinforce the image of their mainstay products while developing new products that meet the emerging needs of an aging Japanese society.

Real Estate

Overall, the condition of the Japanese real estate market remained depressed in fiscal 1997, although there were indications of recovery in selected areas. Asahi strove to enhance the management efficiency of its real estate holdings and develop attractive rental packages. Higher sales more than offset a decline in rental revenues, resulting in consolidated real estate sales increasing 17.5%, to 44.5 billion.
Addressing Social Issues

Asahi recognizes its responsibilities as a corporate citizen and strives to its utmost potential to improve the quality of life in the communities it serves. In addition to supplying fresh, healthy products and engaging in sound environmental management practices, the Company seeks to expand its involvement in activities outside its daily operations with a view toward facilitating well-rounded lifestyles. Asahi has been a prominent supporter of the arts and cultural events for many years. Asahi’s lobby concerts and lectures, which have been held at various Company facilities since 1991, have proven extremely popular with employees and the public. No admission is charged for these events, which provide such diverse entertainment as musical performances by local and overseas artists and lectures on art and cultural themes by speakers prominent in their fields. To commemorate winning the 1996 Grand Meidan Award—one of several awards granted yearly by the Association for Corporate Support of the Arts—Asahi held a lecture series entitled “Challenge to the Arts” at the Company’s head office between January and March 1997.

Concerts were also held at each of the Company’s brewing facilities between March and October 1997. The Asahi Beer Arts Foundation, established in 1989, also plays an active role in promoting the arts in Japan. The foundation aims to broaden people’s artistic horizons by sponsoring such events as ballet and opera performances and art exhibitions. Another primary goal of this foundation is the fostering of cultural exchange. To this end, it provides scholarships to overseas students in Japan who study music and traditional Japanese arts. In 1997, scholarships were awarded to 13 students from various countries, bringing to date the total number of scholarships given to 50. In 1997, more than 120,000 people visited the Asahi Beer Oyamazaki Villa Museum, in Kyoto Prefecture. Opened in April 1996, the museum is a refurbished architectural treasure situated among scenic surroundings, which include a park and an art gallery developed from a historic Western-style building constructed in the Taisho period (1912-1926) by the late Shotaro Koga, one of the founders of The Nikka Whisky Distilling Co., Ltd. The property was...
purchased jointly by Asahi and the Oyamazaki local government in 1991 in response to a request by the Kyoto prefectural government. The museum houses an extensive collection of Japanese art plus works of Bernard Leach and other major 20th century sculptors. A number of art treasures are on display in the adjacent art gallery, including works by Claude Monet. As part of broad efforts to foster community spirit, Asahi encourages employees to participate in community volunteer activities. Participation in such activities as sign language classes and UNICEF campaigns not only helps disabled and needy people but also contributes to employees’ personal development. Asahi intends to increase its cooperation with other businesses and nonprofit organizations to support local volunteer groups, while working to improve the preparedness of communities for earthquakes and other natural disasters. To strengthen their ties with local communities, all of Asahi’s brewing facilities hold an annual Customer Appreciation Day in which brewery tours and entertainment are provided for the enjoyment of visitors.

FINANCIAL REVIEW

In fiscal 1997, ended December 31, 1997, Asahi's consolidated net sales expanded ¥101.2 billion, or 8.4%, to ¥1,313.3 billion.

In alcoholic beverages, Asahi concentrated on promoting Asahi Super Dry and other brands, while implementing vigorous campaigns to raise the profile of such distinctive new offerings as Asahi REDS. These efforts resulted in net domestic beer sales rising 11%, significantly above the industry average.

In the other alcoholic beverages category, the demand for whiskey was boosted by revisions to the Liquor Tax Law that led to lower whiskey prices. Nikka Whisky Distilling completed the successful launch in October of its New Malt Club and Black Nikka Clear Blend whiskeys; however, their strong performances were not enough to offset slow sales amid slack demand in the first nine months of the year, and sales of alcoholic beverages increased ¥84.8 billion, or 9.1%, to ¥1,017.9 billion.

In the soft drinks and food sector, Asahi focused on boosting the profile of Mitsuya Cider, the fruit juice drink Bireley’s Orange, and other mainstay products in its soft drinks lineup. Asahi released a new canned coffee, WONDA, conducted numerous brand name marketing campaigns, and strengthened its distribution by expanding the Company’s vending machine network and developing marketing proposals for supermarkets and convenience stores. These efforts resulted in soft drinks sales volumes rising 13.0%. Owing to these activities, sales of soft drinks and food grew 6.3%, to ¥204.2 billion.

In the pharmaceuticals industry, a solid performance by ethical drugs supported a 4.3%, or ¥1.7 billion, increase in pharmaceutical sales, to ¥41.9 billion, while real estate revenues rose ¥0.7 billion, or 17.9%, to ¥4.5 billion, as Asahi recorded renewed growth in real estate sales. In other businesses, favorable conditions in the transportation business led revenues to expand 4.4%, or ¥1.9 billion, to ¥44.8 billion.

FINANCIAL POSITION

At December 31, 1997, consolidated total assets stood at ¥1,616.2 billion, down ¥81.1 billion, or 4.8%, from the previous fiscal year-end. This contraction reflected the sale by Asahi Beer International Holding (Australia) Ltd. of shares issued by Australian brewer Foster’s Brewing Group Ltd. and bonds, as well as repayments of long-term loans from banks.

COSTS AND EXPENSES

The growth in net sales during the year under review was accompanied by an increase in the cost of sales, which advanced ¥96.5 billion, or 11.6%, to ¥938.2 billion. The increase also resulted in a ¥47.5 billion, or 9.9%, rise in the amount of alcohol tax paid, to ¥530.6 billion.

Selling, general and administrative expenses increased ¥17.5 billion, or 6.1%, to ¥304.3 billion. The principal reasons for this expansion were a ¥6.5 billion rise in promotional expenses, incurred mainly in the soft drinks business, and a ¥2.4 billion rise in sales premiums and commissions.

OPERATING INCOME AND NET INCOME

Despite the increase in net sales, severe operating conditions in the soft drinks market, particularly after the increase in the national consumption tax rate in April 1997, combined with aggressive investments in promotional and marketing activities led to a 3.4% decline in operating income, to ¥96.3 billion.

Interest and dividend income fell due to the decline in market interest rates and the weak performance of domestic stock markets. In addition, a ¥20.5 billion loss on liquidation of unconsolidated subsidiaries resulted in net other income (expenses) totaling ¥163.5 billion, approximately the same level as in the previous fiscal year.

Consequently, income before income taxes fell 9.6%, to ¥82.8 billion. In contrast, net income soared ¥13.3 billion, or 40.4%, to ¥111.6 billion. Net income per share for the year under review was ¥25.15, up from ¥19.18 in the previous fiscal year.

Annual cash dividends per share applicable to the year were raised ¥1.00, to ¥11.00.

Due primarily to these factors, total consolidated liabilities contracted ¥136.0 billion, to ¥1,241.6 billion.
Consolidated total shareholders' equity rose ¥54.9 billion, to ¥374.6 billion, due to the holders of convertible bonds exercising their subscription rights. Consequently, the shareholders' equity ratio increased from 18.8% to 23.2%.

**CASH FLOWS**

During the year under review, Asahi's cash receipts rose in tandem with expanding sales of beer as well as soft drinks and food. While proceeding with the construction of the Shikoku Brewery, the Company's ninth domestic brewery, and other capital investments to support long-term growth, Asahi took advantage of its strong cash flow position to strengthen its capital structure.

Net cash provided by operating activities amounted to ¥95.0 billion. This figure represents net income of ¥11.6 billion, after being adjusted for depreciation of ¥35.7 billion and other non-cash operating items.

Net cash provided by investing activities amounted to ¥25.3 billion. The major factors contributing to this figure were ¥69.3 billion in capital investments, net of increase in accounts payable relating to construction, and ¥79.5 billion in proceeds from the sale of marketable and investment securities, which primarily reflected the liquidation of specified money trusts and the sale of shares issued by Foster's Brewing Group and bonds.

Net cash used in financing activities amounted to ¥120.9 billion, ¥38.3 billion higher than the figure for fiscal 1996. The main components of this total were ¥73.7 billion used for the redemption of bonds and ¥54.9 billion applied to repayments of long-term loans from banks.

Due to these factors, cash and cash equivalents at end of year totaled ¥22.6 billion, down from ¥22.9 billion at the previous fiscal year-end.

### Cash flows from operating activities:

- **Net income:** ¥ 11,555
- **Adjustments to reconcile net income to net cash provided by operating activities:**
  - Depreciation (Note 14): ¥ 35,740
  - Loss on sale and disposal of property, plant and equipment—net: ¥ 7,966
  - Loss on liquidation of unconsolidated subsidiaries (Note 12): ¥ 20,463
  - Loss on sale and revaluation of securities: ¥ 15,119
  - Allocation of unrealized exchange loss: ¥ 3,215
  - Minority interests in net income of consolidated subsidiaries: ¥ 2,384
  - Equity in net income of unconsolidated subsidiaries and affiliated companies: (¥ 150)
  - Net change in beginning retained earnings: (¥ 1,160)
  - Other: ¥ 133

- **Changes in operating assets and liabilities:**
  - Increase in notes and accounts receivable: (¥ 22,341)
  - Increase in inventories: (¥ 4,564)
  - Decrease (increase) in other current assets: (¥ 3,640)
  - Increase (decrease) in notes and accounts payable (excluding construction): ¥ 22,228
  - Increase (decrease) in alcohol tax and consumption tax payable: ¥ 19,648
  - Increase in deposits received: ¥ 8,266
  - Increase (decrease) in income taxes payable: (¥ 10,863)
  - Increase (decrease) in accrued and other liabilities: (¥ 10,355)

- **Net cash provided by operating activities:** ¥ 94,988

### Cash flows from investing activities:

- **Capital investments (Note 14):** (¥ 100,936)
- **Proceeds from disposal of property, plant and equipment:** ¥ 8,650
- **Increase in accounts payable relating to construction:** ¥ 31,671
- **Decrease (increase) in marketable and investment securities:** ¥ 79,509
- **Decrease in specified money trusts:** ¥ 7,856
- **Decrease in long-term loans receivable:** ¥ 2,316
- **Increase in other investments:** (¥ 4,098)

- **Net cash provided by investing activities:** ¥ 25,268

### Cash flows from financing activities:

- **Proceeds from long-term loans from banks:** ¥ 18,673
- **Repayments of long-term loans from banks:** (¥ 54,869)
- **Redemption of bonds:** (¥ 73,700)
- **Proceeds from bonds and convertible debentures issued:** ¥ 8,000
- **Increase (decrease) in bank loans:** (¥ 14,274)
- **Cash dividends paid:** (¥ 4,705)
- **Payment for subrogation of a subsidiary’s liabilities:** —
- **Purcahse and retirement of treasury stock (Note 10):** (¥ 1,000)

- **Net cash used in financing activities:** (¥ 120,875)

### Effect of exchange rate change on cash and cash equivalents:

- **Net decrease (increase) in cash and cash equivalents:** (¥ 295)
- **Net cash used in financing activities:** (¥ 22,603)

### Net cash and cash equivalents at end of year:

- **Ending balances:** ¥ 22,603

### Supplemental disclosures of cash flow information:

- **Conversion of convertible debentures to common stock:** ¥ 48,359
- **Cash paid during the year for: (Note 16)**
  - Interest: ¥ 41,983
  - Income taxes: ¥ 32,199

### See accompanying notes.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Asahi Breweries, Ltd. and Consolidated Subsidiaries

1. BASIS OF PRESENTING FINANCIAL STATEMENTS

ASAHI BREWERIES, LTD. (the “Company”), a Japanese corporation, maintains its records and prepares its financial statements in Japanese yen in accordance with accounting principles generally accepted in Japan.

The accompanying consolidated financial statements have been translated from the financial statements that are prepared for Japanese domestic purposes in accordance with the provisions of the Securities and Exchange Law of Japan and filed with the Ministry of Finance of Japan. In preparing the accompanying financial statements, certain modifications, including the presentation of the statements of shareholders’ equity and cash flows, have been made to facilitate understanding by readers outside Japan.

The financial statements are stated in Japanese yen. The translations of Japanese yen amounts into U.S. dollars are included solely for the convenience of readers, using the prevailing exchange rate at December 31, 1997, which was ¥130.10 to U.S.$1. The convenience translations should not be construed as representations that the Japanese yen amounts have been, could have been, or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

Certain reclassifications have been made in the 1996 and 1995 financial statements to conform to the presentation for 1997.

2. SIGNIFICANT ACCOUNTING POLICIES

Consolidation—The consolidated financial statements have included the accounts of the Company and its significant subsidiaries (22 domestic and 1 overseas subsidiary for 1997, 22 domestic and 2 overseas subsidiaries for 1996 and 24 domestic and 3 overseas subsidiaries for 1995).

The excess of investment cost over net assets at the date of acquisition is analyzed, and the portion regarded as land value increase is allocated to the cost of land. The remaining portion which cannot be identified is deferred and amortized over five years (except for investment in Torii Pharmaceutical Co., Ltd., which is amortized over 15 years) on a straight-line basis.

All the significant intercompany accounts and transactions have been eliminated.

Equity method—Investments in certain unconsolidated subsidiaries are accounted for by the equity method and, accordingly, stated at cost adjusted for equity in undistributed earnings and losses from the date of acquisition.

Cash and cash equivalents—Cash and cash equivalents include cash and time deposits with a maturity of three months or less.

Allowance for doubtful accounts—The allowance for doubtful accounts is provided in amounts sufficient to cover possible losses on collection. It is determined by adding individually estimated uncollectible amounts to an amount calculated by formulas permitted by the Corporation Tax Law of Japan with respect to the remaining receivables.

Securities—All securities included in both current assets and non-current investments are stated at cost determined by the moving-average method. Securities included in specified money trusts are valued at the moving-average cost on a portfolio basis. If a decline in value below cost of a security is judged to be material and other than temporary, the carrying value of the individual security is written down.

Inventories—Inventories are stated at cost. Cost is determined mainly by the weighted-average method for all inventories except for property, plant, and equipment, which is determined on an individual basis.

Property, plant, and equipment—Property, plant, and equipment are carried substantially at cost. Depreciation is provided by the straight-line method with respect to production facilities and by the declining-balance method with respect to remaining assets. Estimated useful lives of the assets are as follows:

- Buildings and structures: 3-65 years
- Machinery and equipment: 2-20 years

Japanese tax regulations allow a company to defer capital gains on the sale of real estate if the company intends to offset such gains against the cost of newly acquired property, plant, and equipment. When such accounting is followed, the cost of the new property, plant, and equipment is reduced to the extent of the deferred capital gains, thereby affecting related depreciation charges and accumulated depreciation.

Income taxes—Income taxes in the accompanying balance sheets have been provided for the amounts currently payable for each year based on taxable income.

From the year ended December 31, 1995, deferred income taxes are provided for the temporary differences arising from the elimination of unrealized intercompany profits (see Note 3).

Employees’ retirement benefits—Non-contributory funded plans of the Company and its domestic consolidated subsidiaries cover a certain portion of the amount which would be required had all eligible employees voluntarily retired at the balance sheet date. The liabilities under the unfunded plan are provided at 40% of the remaining amount.

Annual contributions, which consist of normal costs as well as of amortization of prior service costs over approximately 13 years and 9 months, are charged to income when paid.

Translation of foreign currency accounts—Current monetary assets and liabilities denominated in foreign currencies are translated into Japanese yen at the exchange rate prevailing on the balance sheet date. The resulting translation gains or losses are included in “Other income (expenses), Other—not.” Non-current assets and liabilities denominated in foreign currencies are translated at the historical exchange rate.

Translation of foreign currency financial statements—Through 1996, the balance sheet accounts of foreign consolidated subsidiaries were translated at the rate of exchange in effect at the balance sheet date, except long-term monetary assets and liabilities and deferred items, which were translated at historical rates. Income and expense accounts, except amortized deferred items, were translated at average exchange rates in effect during the year. Net income for the year and retained earnings at the end of the year for foreign consolidated subsidiaries were translated at the rate of exchange in effect at the balance sheet date. Differences arising from translation were presented as “Foreign currency translation adjustments” in the accompanying consolidated financial statements.

From 1997, due to the application of the revised Accounting Standards for Foreign Currency Transactions, the balance sheet accounts of foreign consolidated subsidiaries are translated at the rate of exchange in effect at the date of the subsidiary’s balance sheet, except for (1) common stock, additional paid in capital, and legal reserve, which are translated at historical rates, and (2) retained earnings, which constitute an accumulation of translated amounts of net income in the respective years. Income, expense and net income for the year for foreign consolidated subsidiaries are translated at the rate of exchange in effect at the subsidiary’s balance sheet date. Differences arising from translation are presented as “Foreign currency translation adjustments” in the accompanying consolidated financial statements. The effect on the consolidated financial statements of the application of the revised standards was immaterial.
Amounts per share of common stock—Computations of net income per share of common stock are based on the weighted-average number of shares in issue during each year. For the computation of diluted net income per share, the average number of shares was increased by the number of shares that would have been outstanding assuming all convertible debentures were converted on January 1, 1997 and 1996. Related interest expense, net of income tax, has been eliminated. Cash dividends per share represent actual amounts applicable to the respective years.

3. CHANGE IN ACCOUNTING POLICY

Effective from the year ended December 31, 1995, the Company adopted the deferred income tax accounting method for temporary differences arising from the elimination of unrealized intercompany profits. This change was made for the purpose of recognizing income tax expense (credit) on eliminated unrealized intercompany profits, due to such items having increased materiality on net income and retained earnings as a result of an increase in the number of companies included in consolidation and accounted for by the equity method. This change led to increases in net income for the year ended December 31, 1995 and retained earnings at January 1, 1995 of ¥197 million and ¥10,673 million, respectively.

4. INVENTORIES

Inventories at December 31, 1997 and 1996 consisted of the following:

<table>
<thead>
<tr>
<th></th>
<th>Millions of yen</th>
<th>Thousands of U.S. dollars</th>
</tr>
</thead>
<tbody>
<tr>
<td>Finished goods</td>
<td>¥16,423</td>

</tr>
<tr>
<td>Net unrealized gains (losses)</td>
<td>¥(38,192)</td>
<td>(293,558)</td>
</tr>
</tbody>
</table>

6. DERIVATIVE TRANSACTIONS—THE PARENT COMPANY ONLY

The Company enters into interest rate swap contracts in order to minimize interest expense and interest rate risk within the limits of the balance of debentures and loans. The contract amounts of derivative transactions outstanding at December 31, 1997 were as follows:

<table>
<thead>
<tr>
<th></th>
<th>Millions of yen</th>
<th>Thousands of U.S. dollars</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interest rate swap:</td>
<td></td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td>Pay variable</td>
<td>12,000</td>
<td>92,237</td>
</tr>
</tbody>
</table>
7. BANK LOANS, COMMERCIAL PAPER AND LONG-TERM DEBT

Bank loans at December 31, 1997 and 1996 were represented by short-term notes or overdrafts, bearing interest at rates of 0.65% to 2.67% per annum for 1997 and 0.58% to 1.625% per annum for 1996.

The Company has entered into a yen domestic commercial paper program with a current maximum facility amount of ¥200,000 million ($1,537,279 thousand). There were no outstanding balances at December 31, 1997 and 1996.

Long-term debt at December 31, 1997 and 1996 consisted of the following:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>

| 1.0% convertible debentures due 2003 | 1,165.0 | 8.95 |

The trust deeds, under which the domestic convertible debentures were issued, provide, among other conditions, for the conversion prices per share into common shares. The current conversion prices per share at December 31, 1997 were as follows:

At December 31, 1997, 44,948 thousand shares of common stock were issuable upon full conversion of outstanding convertible debentures at the current conversion prices.
At December 31, 1997, the domestic debentures and secured long-term loans were collateralized by "factory mortgages" pursuant to the Factory Hypothecation Law of Japan as follows:

<table>
<thead>
<tr>
<th></th>
<th>Millions of yen</th>
<th>Thousands of U.S. dollars</th>
</tr>
</thead>
<tbody>
<tr>
<td>Land</td>
<td>¥23,365</td>

Unamortized prior service costs under the non-contributory funded pension plan amounted to ¥12,476 million ($95,893 thousand) at December 31, 1997.

The Code provides that an amount equal to at least 10% of cash dividends and bonuses to directors and statutory auditors shall be set aside as a legal reserve until such reserve equals 25% of common stock. The legal reserve is not available for dividends but may be used to reduce a deficit upon approval at a shareholders' meeting, or it may be capitalized by resolution of the Board of Directors.

According to the approval at the annual shareholders' meeting on March 28, 1996, the Company purchased 7,694 thousand of common stock at a cost of ¥10,000 million ($76,864 thousand) and retired the number of shares authorized and outstanding by that number, respectively.

The Code provides that an amount equal to at least 10% of cash dividends and bonuses to directors and statutory auditors shall be set aside as a legal reserve until such reserve equals 25% of common stock. The legal reserve is not available for dividends but may be used to reduce a deficit upon approval at a shareholders' meeting, or it may be capitalized by resolution of the Board of Directors.

At December 31, 1997, the Company and its consolidated subsidiaries were contingently liable as guarantors for borrowings of unconsolidated subsidiaries, affiliated companies, employees and others in the amount of ¥12,474 million ($95,881 thousand).

At December 31, 1997, the Company and its consolidated subsidiaries were contingently liable as guarantors for borrowings of unconsolidated subsidiaries, affiliated companies, employees and others in the amount of ¥12,474 million ($95,881 thousand).

13. INFORMATION FOR CERTAIN LEASES

Finance leases which do not transfer ownership to lessees (and do not have bargain purchase provisions) are accounted for in the same manner as operating leases under accounting principles generally accepted in Japan. Lease payments under financial leases, which are accounted for in the same manner as operating leases, for the year ended December 31, 1997, were as follows:

<table>
<thead>
<tr>
<th>Millions of yen</th>
<th>Thousands of U.S. dollars</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lease payments</td>
<td>¥23,650</td>
</tr>
</tbody>
</table>

This information is required to be disclosed, with effect from 1997.

14. SEGMENT INFORMATION

The Company operates primarily in the production and sales of alcoholic beverages, soft drinks and food, pharmaceuticals, real estate and others. Business segment information for the years ended December 31, 1997, 1996 and 1995 was as follows:

15. **SUBSEQUENT EVENTS**

(A) The Company issued domestic unsecured debentures for capital investments as follows:

<table>
<thead>
<tr>
<th>Millions of yen</th>
<th>Thousands of U.S. dollars</th>
<th>Date of issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.5% debentures due 2003</td>

<td>$76,864</td>
</tr>
<tr>
<td>2.0% debentures due 2001</td>
<td>10,000</td>
<td>76,864</td>
</tr>
</tbody>
</table>

(B) The Board of Directors' meeting held on March 27, 1998, resolved the issue of ¥100,000 million ($800,900 thousand) of domestic convertible debentures.

(C) At the March 27, 1998 annual meeting, the Company's shareholders approved the following appropriations of retained earnings:

(i) Payment of a year-end cash dividend of ¥6.00 per share aggregating ¥2,894 million ($22,244 thousand),

(ii) Payment of bonuses to directors and statutory auditors in the amount of ¥99 million ($757 thousand), and

(iii) Transfer of ¥160 million ($1,273 thousand) from retained earnings to the legal reserve.

(D) At the same meeting, the following new provision in the articles of incorporation was approved:

The Company may acquire its own shares, upon resolution of the Board of Directors, within the maximum limit of 40,000 thousand shares to retire such shares by offsetting against retained earnings.

Effective from the year ended December 31, 1996, business segment information for identifiable assets, depreciation and capital investments was required to be disclosed. Assets in the corporate column mainly comprise current and non-current securities of the Company.

Sales outside Japan and sales to foreign customers were less than 10% of the Company's consolidated net sales for 1997, 1996 and 1995.
REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

To the Board of Directors of
ASAHI BREWERIES, LTD.:

We have audited the accompanying consolidated balance sheets of ASAHI BREWERIES, LTD. (a Japanese corporation) as of December 31, 1997 and 1996, and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 1997, expressed in Japanese yen. Our audits were made in accordance with auditing standards generally accepted in Japan and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the consolidated financial statements referred to above present fairly the consolidated financial position of ASAHI BREWERIES, LTD. as of December 31, 1997 and 1996, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 1997, in conformity with accounting principles generally accepted in Japan applied on a consistent basis, except for the change made as of January 1, 1995, in the method of accounting for income taxes as referred to in Note 3.

Also, in our opinion, the U.S. dollar amounts in the accompanying consolidated financial statements have been translated from Japanese yen on the basis set forth in Note 1.
