Extensive Experience That Transform Challenges

The Asahi Group has achieved growth throughout the years by cherishing three values: “challenge and innovation” that creates new value, such as the release of Asahi Super Dry, which at the time completely changed the way people thought about beer, and the cultivation of brands loved by all generations; “excellence in quality” that the Group delivers to its customers; and “shared inspiration” that the Group enjoys with its stakeholders. Drawing on these values as its foundation, the Group will leverage strengths such as its long-cultivated brands and human resources in Japan and overseas to deliver premium value to an even greater number of customers around the world.

1889 – 1987 – 1989

The starting point for “the highest level of quality” and “challenges and innovation”

The Company was founded in 1889 with the aim of producing authentic Japanese beer that is made by Japanese people. Winning awards at expos and exhibitions both domestically and abroad, we are constantly striving for “the highest level of quality,” which has been a part of our corporate culture since our founding.

An incredible leap brought about by years of innovation

In 1987, Asahi launched Japan’s first dry draft beer, Asahi Super Dry, which was brought to fruition by ideas that went beyond the common ways of thinking within the beer industry at that time. Since then, Asahi has worked to spur innovation in its overall supply chain management in such ways as establishing quality standards for freshness. In 1998, these efforts would culminate in Asahi capturing the top share of Japan’s beer market.

1889 – 1949 – 1987 –

A second start and further innovation

In 1949, Asahi Breweries, Ltd. was established, a product of a corporate breakup brought on by post-war economic decentralization in Japan. Thereafter, Asahi continued to expand its business foundation, centered on its whisky and spirits and soft drinks businesses, and worked to create new drinking opportunities, including the introduction of canned beer in Japan.

Trend in Revenue∗1
Expanding our business portfolio, and strengthening our brands by leveraging synergies

In 2001, Asahi entered the happoshu market and captured the top share in Japan’s beer and happoshu markets. Vigorous M&A activity in the Alcohol Beverages (excluding beer-type), Soft Drinks, and Food Businesses made the Asahi brand a top name in each respective category. Furthermore, Asahi expanded its portfolio, the Company worked to enhance the brand strength in each of its businesses by developing synergies across their entire range.

2009–

Making strategic moves toward global growth

In Japan, Asahi continued its cultivation of new brands, such as Clear Asahi, WILKINSON, and MINTIA, which created new demand for drinking and eating to drive growth of their respective markets, and acquired CALPIS, a popular lactic acid bacteria beverage. Overseas, Asahi took on a new challenge as a global player, entering markets in Oceania and Southeast Asia and carrying out a large-scale acquisition of European beer businesses.

2018–

Fortifying our global business foundation in the pursuit of further growth

To establish its business foundation—which now spans the globe with the entry of the European business into the Group—as a driver for further growth, Asahi is striving for unique value creation underpinned by its newly formulated Asahi Group Philosophy (AGP). In 2020, Asahi acquired the Australian business Carlton & United Breweries Pty. Ltd. (CUB) of Anheuser-Busch InBev SA/NV, thereby establishing a structure focused on three core regions of operations: Japan, Europe, and Australia. By combining its strengths such as the brands and human resources in these three regions, Asahi aims to become a Global Value Creation Company.
Further Accelerating Value Creation Through Management Strategies That Reflect the AGP

Under the AGP, we laid out Our Mission and Our Vision, which are goals that the Asahi Group should realize in the future. To reach these goals, we will steadily implement our value creation process, which establishes Our Values and Our Principles—the other two parts of the AGP—as the source of our corporate value creation, and our Medium-Term Management Policy.

*1 On June 1, 2020, we completed the acquisition of the CUB business. In relation to this acquisition, we have been examining financing plans, including fundraising. The information on the guidelines of the Medium-Term Management Policy, which is outlined on pages 40 and 41, does not take into account the impact of the CUB acquisition and associated fundraising. Accordingly, we intend to review our Medium-Term Management Policy taking into consideration the impact of acquiring the CUB business.

*2 Core operating profit is the reference index for normalized business performance.

Core operating profit = Revenue – (Cost of sales + Selling, general and administrative expenses)

*3 Adjusted figures are calculated after the deduction of special factors including business portfolio restructuring and the impact of foreign exchange rates.
